

Statement of Purpose

Introduction

My name is Mandeep Kaur and the number on my passport is S7282967. I have crafted this statement of purpose to provide you with the full fledged information about my profile. I am interested in learning the latest advances and technologies in the medical and healthcare field. I want to learn deeply about a wide range of health disciplines with proper medical research to improve the health and well-being of people in my home country. As this field is entirely based on practical knowledge, I want to study at a university that focuses on clinical practice and research. Therefore, I aspire to pursue a Master of Public Health program at University of New Haven in the USA so that I will be able to contribute to the betterment of society.

Academic Background

I completed my 10th standard from the PSEB Board in 2014 with 74% marks. After that, I completed my 12th standard from the PSEB Board in 2016 with 70% marks. After that, I completed a diploma in General Nursing and Midwifery at Khalsa College Of Nursing, Amritsar from Sept-2016 to Dec-2019. I have also completed my BSc. Nursing at Baba Farid University Of Health Sciences, Faridkot in 2023. I have given the PTE exam in 2023 and scored 66 points.

Why Master of Science in Public Health?

I have a great interest in learning what diseases are, how they are spread, how they impact people and the way to cure them. I want to protect people from chronic diseases to ensure well-being and promote a healthy society. That's why I want to go ahead with an MS in Public Health program. I have checked the detailed curriculum of this program on the official website of the university and found that the concepts covered in this program will help me learn everything related to the public health and healthcare sector. I will get a deep understanding of the impact of climate change, and substance abuse on public health. Moreover, this master's degree will allow me to learn about different areas of public health competency such as public health ethics, public health laws, healthcare leadership, global health, health policy and health management. The combination of theoretical knowledge, practical knowledge and skills will help me prepare to contribute to the health, fitness and well-being of people.

Why the University of New Haven?

I am impressed with the higher ranking and education quality offered by the University of New Haven. I chose this university because of its focus on real-world practical learning. Apart from education, the university is also known for putting emphasis on extracurricular activities. Hence, it is the right place for me to grow personally, professionally and academically. In addition, the welcoming and supportive community at the University of New Haven grabbed my attention at once. Considering all these points, I decided to study at this university.

Career Opportunities

An international degree in public health program will be greatly valued by employers in India both in the public and private sectors. So, I will return to India after completing this master's degree with excellent scores. For me, earning this degree will transform my life and advance my profession as I will be able to be equipped with the skills to work as a:

- Community Health Worker
- Health Education Specialist
- Wellness Director
- Nurse
- Physician
- Nutritionist

In the end, I think that the abilities and knowledge I get from this program will prepare me to succeed in demanding positions in the healthcare sector. I hope you will respond positively and allow me to study at this leading university. There are things that somehow motivated me to apply for this specific type of course and the university. I assure you that after the completion of my Master of Public Health program at University of New Haven, I will definitely return back to my own nation and work wonders for my nation.

Warm Regards,
Mandeep Kaur
